

FIWARE DSC: Advanced features

Víctor Rampérez - Senior DevOps Engineer

Agenda

- FIWARE DSC dashboard
- Onboarding portal
 - Global Verifiable Credential (VC) Issuer
- Central marketplace
 - DS operator
 - Provider (Provider + Consumer)

FIWARE DSC dashboard

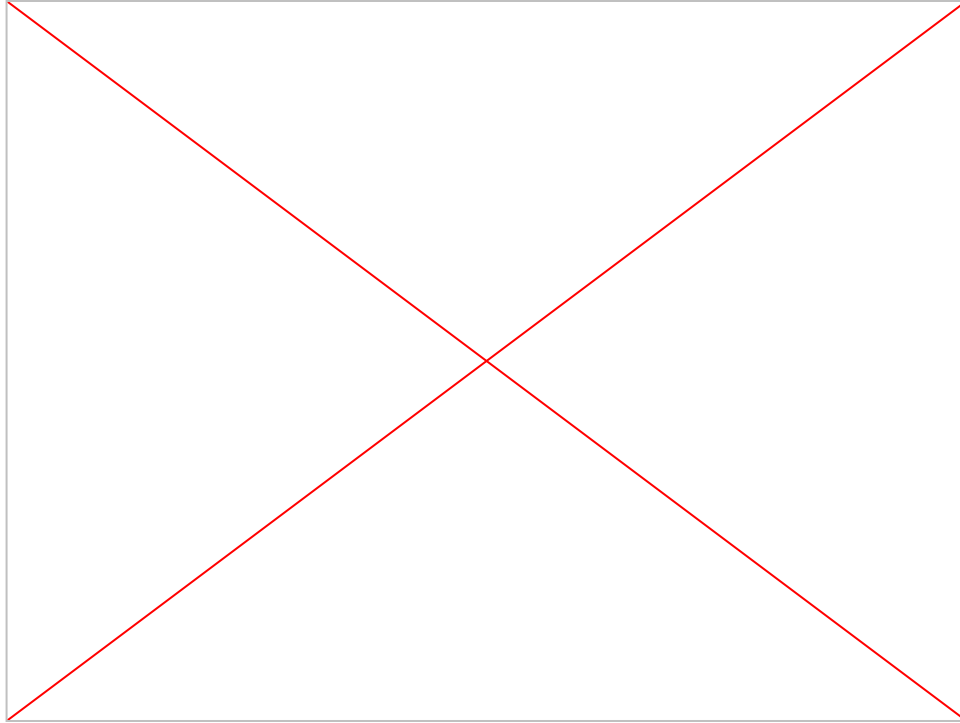

- Role: Provider, Provider + Consumer (optional component)
- Web application to manage the FIWARE DSC
- Features:
 - Manage DSC policies (CRUD)
 - Manage DSC Credentials Config Service (CRUD)
 - Manage DSC Trusted Issuers List (CRUD)
 - APISIX dashboard integrated
 - Grafana dashboard integrated
 - Telemetry dashboard (tempo)
- Requirements:
 - Keycloak with realm and client for dashboard
- Configuration example [here](#)
 - Can be enabled in the FIWARE DSC helm chart

Source code: <https://github.com/SEAMWARE/fdsc-dashboard>

Helm chart: <https://github.com/FIWARE/helm-charts/tree/main/charts/fdsc-dashboard>

FIWARE DSC dashboard (demo)

Onboarding portal

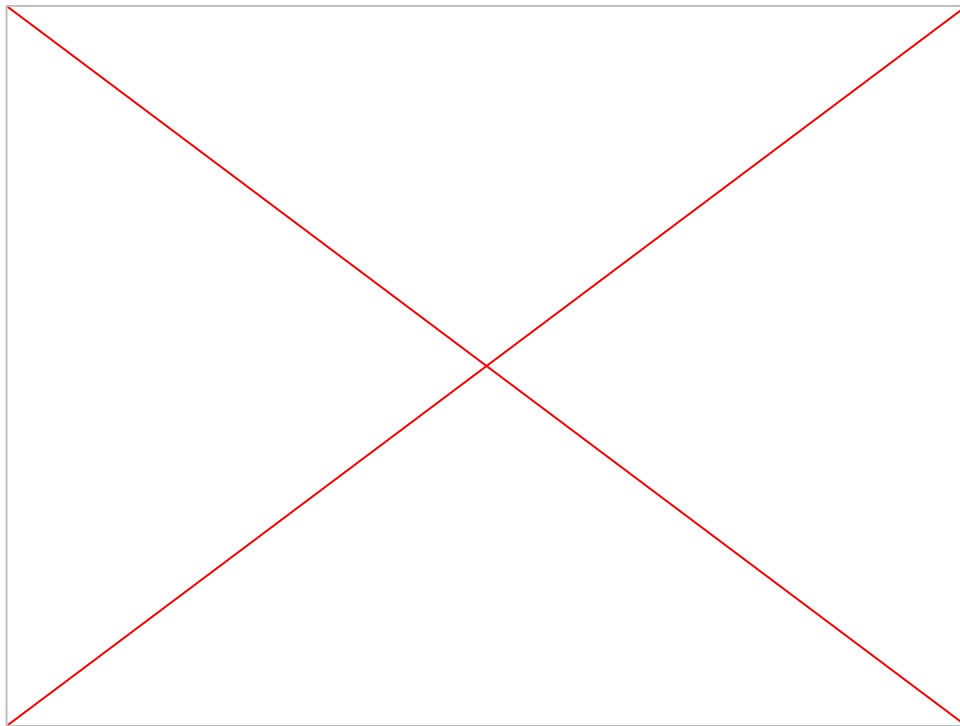

- Role: operator
- Features:
 - Enables organizations to submit and register data space onboarding requests
 - Allows DS Operators to manage requests (accept, reject, or request modifications)
 - Grants valid participant status within the Data Space upon request approval
 - Email notifications
- Requirements:
 - SQL database
 - Keycloak realm for admin portal
 - Email configuration (nodemailer). Doc available [here](#)

Source code: <https://github.com/SEAMWARE/On-Boarding-Portal>

Helm chart: <https://github.com/FIWARE/helm-charts/tree/main/charts/onboarding-portal>

Onboarding portal (demo)

Onboarding portal: Global VC Issuer

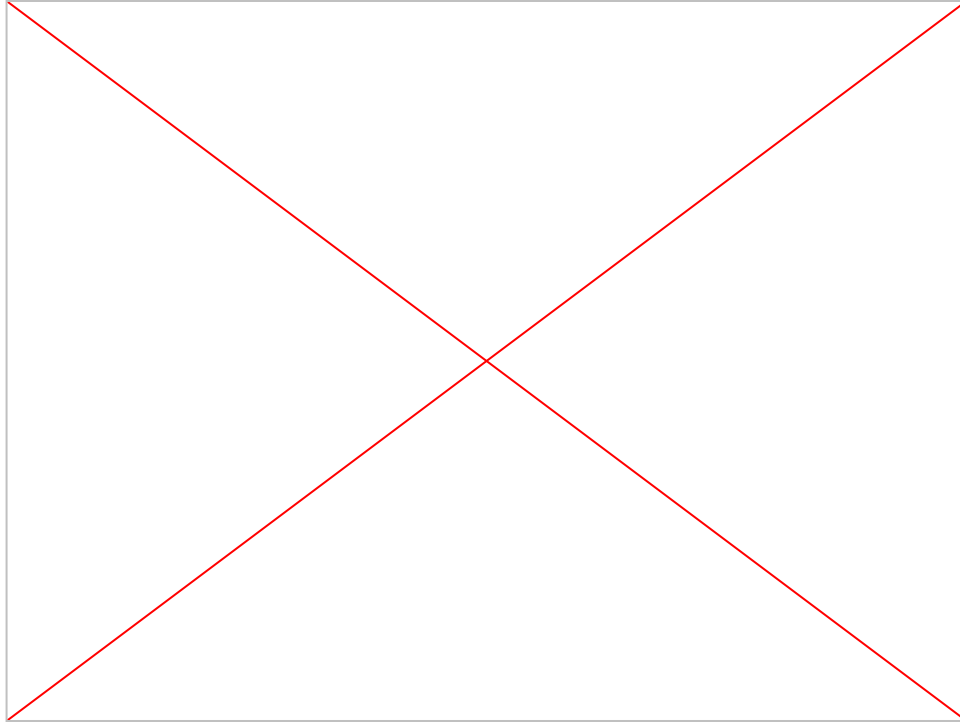

- Role: DS operator
- Features:
 - Realm creation for organizations in a centralized Keycloak for VC management and issuance
 - DID creation and hosting for organizations within the DS Operator's infrastructure
- Requirements:
 - SQL database
 - Keycloak realm for admin portal
 - Email configuration (nodemailer). Doc available [here](#)
- Configuration example [here](#)

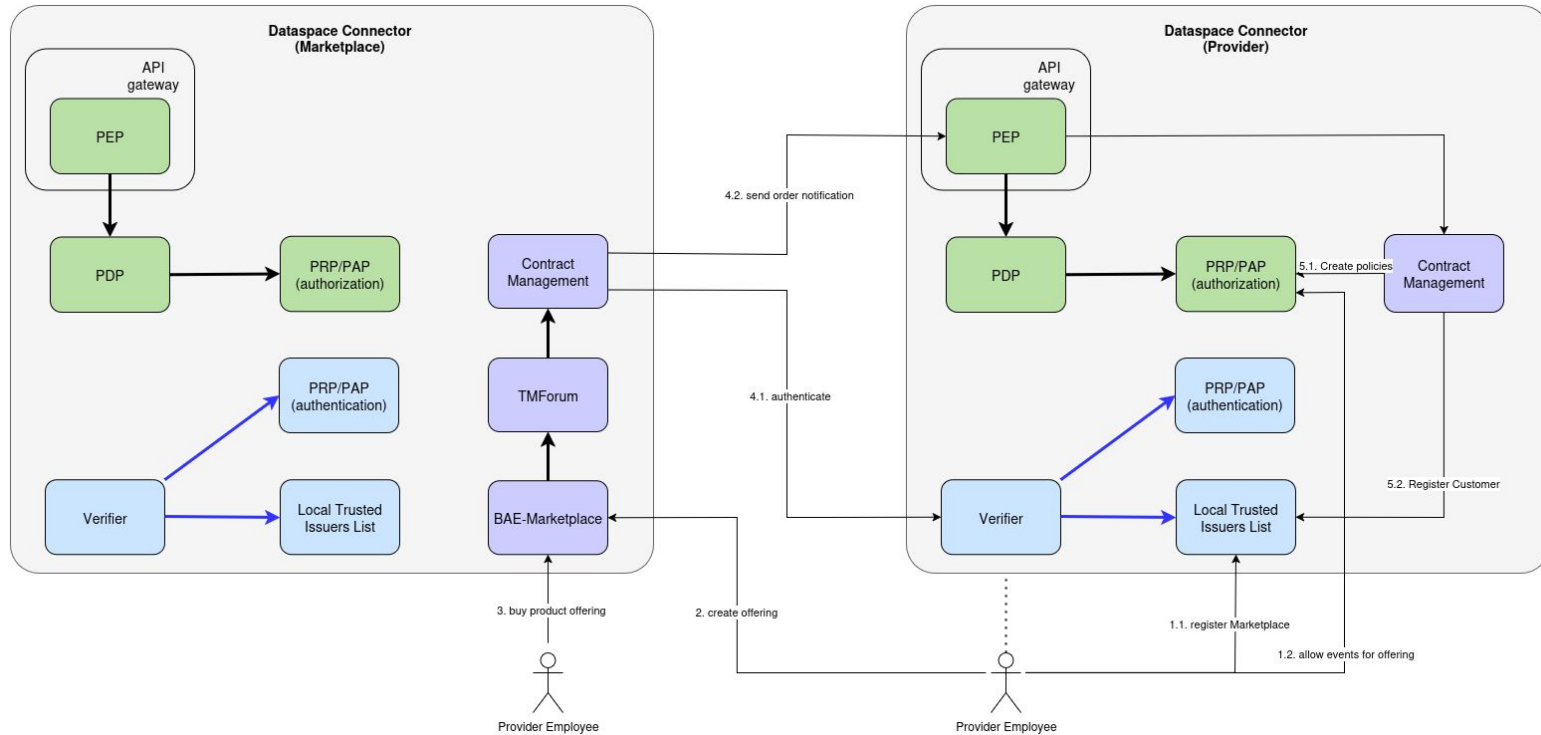

Source code: <https://github.com/SEAMWARE/On-Boarding-Portal>

Helm chart: <https://github.com/FIWARE/helm-charts/tree/main/charts/onboarding-portal>

Central marketplace: overview

Doc: https://github.com/FIWARE/data-space-connector/blob/main/doc/CENTRAL_MARKETPLACE.md

Central marketplace: DS operator

- Role: DS operator
- Same required components as provider and:
 - Marketplace
 - TM Forum APIs (and scorpio)
 - Contract management
- Configuration example [here](#)

Doc: https://github.com/FIWARE/data-space-connector/blob/main/doc/CENTRAL_MARKETPLACE.md

Central marketplace: provider

- Role: provider
- Changes to the FIWARE DSC of the provider:
 - Register the Marketplace as a trusted-issuer of credentials used by the Contract Management
 - Expose contract-management through the DSC
 - Create APISIX routes and ingress
 - Register policies that allow the marketplace to send order notifications to the Contract-Management
 - Provider has to register itself at the Central Marketplace as an Organization, containing access information to the Contract Management
- Configuration example [here](#)

Doc: https://github.com/FIWARE/data-space-connector/blob/main/doc/CENTRAL_MARKETPLACE.md

Q&A

Thank you!
